

The Diets modify the body chemistries of both mother and father according to scientifically-proven clinical tests to influence the gender of their next child before they conceive.

## **The Advantages of the Baby Gender Selection Diet**

General diet guidelines:

- Exact daily intake for each food group.
- complete list of allowed & forbidden foods
  
- practical guide to menu planning
  
- Basic acid/alkaline foods

The specialty Gender Selection Diet Plan is specifically formulated to alter your body chemistry prior to conception. These daily meal plans were designed by qualified clinicians specializing in gender selection. The Gender Selection Diet Plan includes specific daily menus tailored to make the necessary preconception changes to your body, that will influence the gender of your next baby.

Our specialty Boy and Girl Gender diets have been designed to alter your body chemistry prior to conception. The Diet needs to be followed for at least 4-6 weeks prior to the month you plan on conceiving. Each Diet includes a 30 day meal plan. Each daily meal plan has been specially formulated by a team of professional, qualified clinicians, specializing in gender selection and nutrition. Careful research and planning is paramount in designing a well balanced diet while achieving the necessary body chemistry changes required for preconception gender selection. The daily menus include suggested meals for Breakfast, Lunch, Dinner, Snacks and Beverages for a 30 day cycle. The 30 day diet cycle should be repeated until conception is confirmed. Once conception is confirmed the Gender Diet should be discontinued.

### **Trial Results\***

"Out of the 6,400 patients treated for male progeny, I have achieved success in 6,208 patients, resulting in a success rate of about 97%.

Out of the 1,410 patients treated for female progeny, I have achieved success in 1,355 patients, resulting in a success rate of about 95%."

\*This is a quote from the study by Dr. Stolwoski and Dr. Lorrain published in the International Journal of Obstetrics and Gynecology 1/2002

### **An Affordable and Easy Approach**

What if you could cut through all the myths, nonsense, and confusion of gender selection and get to the truth? Well, Baby Gender Selection, a U.S. Based fertility clinic, has developed a diet combining the latest genetic research with the more trustworthy techniques of gender selection. The result? A dependable system making parents around the world very happy. Since our introduction we have separated ourselves from the rest by assigning a personal pharmacist to every customer, who is in charge of working with the client to optimize the gender selection diet, make necessary adjustments to the program based on individual requirements and to offer support by being there to competently answer any questions or concerns that may arise.

### **Getting Started**

Now that you've read this far, I'm sure you realize how the Baby Gender Selection's Diet will help you have the baby boy or baby girl you want.

First of all, the Baby Gender selection's Diet is a digital product. This means you can start the diet shortly.

When you're ready, you'll download the the Baby Gender Selection Diet, then we'll contact you and ask for some information about you and your lifestyle. We will start off by assigning you a licensed pharmacist. This pharmacist will then create for you a customized diet and procedure based on the information you give. It's so easy.

## How Much?

You've just discovered the Baby Gender Selection Method is an affordable alternative. It's only a fraction of what other companies charge. The Baby Gender Selection Method - with your own personal pharmacist, and all four bonuses - is available to you for only \$38.00. Far less than a trip to the doctor. And there's no need to wait to get started. In just a few minutes from now, you will be able to download it immediately, enjoy the benefits, and put it into action today!
